

I really like the cacao tree and the molds. **-Ashton Alexakos**

My favorite part was the Mayan part of our tour. **-Boden Chell**

I really enjoyed learning about cocoa beans and where they come from. **-Olivia Cimbora**

I thought how chocolate was made from cacao trees was very interesting. **-Gavin Clark**

The most interesting thing about the chocolate exhibit was that cacao pods are so large. **-Olivia Cowan**

I thought the most interesting thing about our field trip was how long chocolate has been around. **-Joey Craddock**

I enjoyed learning about how the Aztecs used cocoa beans as money. **-Alexandra Drossos**

I thought that the most interesting thing about chocolate is that it grows on trees. **-Dillon Fang**

I enjoyed learning that chocolate was actually really expensive. Well, I might sell some. **-Ellie Frederick**

The most interesting fact I learned about chocolate was that you don't say "coco", you say "cacao". **-Andi Giovanniello**

I thought the most interesting thing about our field trip was that the cacao tree isn't just growing chocolate. It's a tree that depends on the midges to pollinate it and birds to replant it. It's an interwoven process, just to grow chocolate. **-Sadie Gray**

I enjoyed eating the chocolate and drinking the hot chocolate. I learned that chocolate comes from the tree cacao. **-Sam Hazel**

I learned that chocolate was around so so so many years ago and we still use it today. **-Bella Hicken**

I learned that cacao trees grow in a tropical place and not in Utah. **-Katie Horne**

My favorite thing I learned is how people would use cocoa beans and chocolate like people would think that it would cure diseases and would use it to put in tea. **-Ava Isaac**

I love chocolate! It's the best! **-Sammy Jacobsen**

I think without midges we would not have chocolate. That is what I thought was interesting. **-Grace Jensen**

My favorite part of the chocolate exhibit was the cocoa bean tree. **-Megan Johnson**

I thought that the most interesting piece at the museum was the replica cacao tree. **-Matthew Ludlow**

The most interesting part about the exhibit was seeing how chocolate was made. **-Cameron McLaughlin**

I learned about where chocolate comes from. Chocolate comes from a cacao tree. The cacao tree makes cocoa pods and inside those cocoa pods are cocoa seeds. We use the cocoa seed to make chocolate. **-Maya McLaughlin**

I learned that cocoa beans were used for money. I enjoyed the tour because it was fun to learn about different things. **-Kyler Nilson**

I learned about midges and how many times they flap their wings. And where the cocoa beans were formed in South America. **-Kaitlyn Parkinson**

I thought the most interesting fact at the Natural History Museum was that chocolate has been around forever. **-Katherine Riley**

I learned that midges pollinate the cacao trees. **-Clarissa Rollins**

I thought that chocolate comes from a cacao was the coolest thing I learned at the museum. **-Jack Saber**

The most interesting thing would be the fact that the most craving treat in the world (chocolate) is alive because of one tiny bug. **-Caeli Sherman**

I learned that cocoa beans were used for taxes. **-Maggie Simms**

I enjoyed learning about how chocolate was used. **-Georgia Stockham**

I thought that the rainforest replica was cool. **-Isabella Valles**

I thought it was interesting how the first traces of chocolate in the U.S. were in Southwestern Utah. **-Violetta Wharton**
